

A NOVEL TREATMENT TO HELP YOUR CHILD OVERCOME THEIR SOCIAL ANXIETY

Does your 10- to 14-year-old get nervous or scared in social situations (school, restaurants, social gatherings)? He or she may qualify to participate in a research study to reduce their social anxiety.

If eligible, your child will be randomly assigned to one of two interactive computer programs. Eligible participants will complete eight 15-minute sessions during a four-week period and will be compensated for their time.
