

Do you have a baby between 1 and 18 months old?
Do you speak Spanish or English at home?
Does the child's father live with the baby?

Participate in a new research study!

We are interested in the father's role in baby language development.

The study can be done FROM YOUR HOME and includes:

- Two surveys taken on your phone or computer: one to be taken by either parent, the other to be taken by the baby's father.
- One weekend voice recording in your home, using recorders and fun baby vests that we send you.

You will receive \$90 for participating in this study.

The information provided in this study will remain confidential and secure.
